Running on Air

Our Air Motion Treadmill uses advanced air technology creating unique and tailored exercises to incorporate into a horse's existing training routine.

IMPROVE YOUR HORSE'S FITNESS AND CONDITIONING >**

INTRODUCING THE AIR MOTION TREADMILL...

RUNNING ON AIR

The unique and main advantage of our Air Motion treadmill is that the horse is running on eight airbags, which are mounted underneath the floor of the treadmill. We designed this system on the same theory as running shoes by dispersing the impact from the horse's legs and hooves through the airbags. This is kinder on the horse's joints and extends the belt life.

TREADMILL USAGES

- ▶ Being able to exercise horses in all weather conditions.
- ▶ To rehabilitate injured horses.
- ▶ Prepping yearlings for sales.
- ▶ Intermittent training.

**THE TOUCH
SCREEN COMPUTER
ALLOWS YOU TO BUILD
UP A CATALOGUE OF
DETAILED ANALYSIS
ON EACH OF YOUR
HORSES!**

WHERE TECHNOLOGY MEETS EXCELLENCE

The treadmill also comes fitted with a fully functional touch screen computer which helps you track your horses exercise routine, speed, heart rate, elevation/incline, timer, distance and total running time.

ENDORSEMENTS

“ The treadmill has become an integral part of our everyday training program, with up to 20 horses a day using the equipment. Horses with soundness issues, those coming back from a break or operations; as well as those in more traditional training all use the treadmill.”

- DAVID BARRON, TRAINER, N YORKS - UK

“ We have had two Fluid Motion treadmills for two years now. They are far more superior to the previous treadmills that we used to use and seem to be very reliable. We are very happy with the results that we are achieving and would highly recommend this treadmill to other trainers.”

- MIKE DE KOCK, TRAINER, DURBAN - S.A.

“ Since installing my first Fluid Motion treadmill three years ago I have found them to be a huge asset to my training program, bringing horses fitness to a whole new level. Not only from a fitness point of view, I have found them very helpful for horses in rehabilitation and their mental application.”

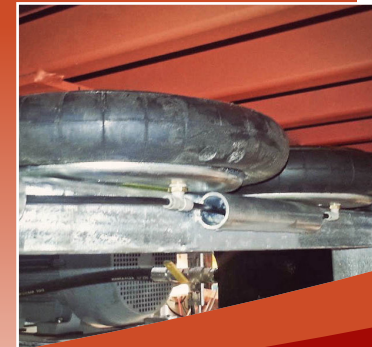

- JOEY RAMSDEN, TRAINER, CAPE TOWN - S.A.

ABOUT FLUID MOTION SERVICES

At Fluid Motion Services we have been proudly manufacturing Horse Treadmills and Walkers since 2008. We have gone on to refine and improve these products over the past few years and currently supply and install our products

to top stud farms and trainers across South African and internationally in Mauritius and the Europe.

Our CEO, Mike Chelin, has owned a hydraulic company, Hybar for the past 18 years, therefore all our products components are made in-house, and all major components are available overseas. Mike has been involved in the horse game for 40 years, owning and breeding race horses and in his youth he played polo and competed in show jumping, it is this experience and great insight into a horse's needs that is the backbone of our company and it's philosophy of producing affordable, quality products that assist the health, fitness and conditioning of horses.

At Fluid Motion Services we custom build treadmills to suit your specific needs and to your own specification, for further details please contact:
